TANKLESS VS TANK

A Tankless
Comparison Guide

TANKLESS VS. TANK

HOW THEY WORK

Operates ONLY when water is needed “on demand” — quickly bringing water to the preset temperature.

Operates 24/7/365 — “always on” — to keep stored water at the preset temperature.

DURABILITY

Lasts up to 20 years or longer
Typical warranty: 12 years

Lasts 10 - 12 years on average.
Typical warranty: 6 years

WHAT HAPPENS WHEN THEY FAIL

No damage to surroundings because no water is stored in the unit!

7 of 10 cases, the tank **bursts** dumping 30 to 80 gallons of rusty water on the floor, causing a major mess and sometimes damaging its surroundings.

COST

\$\$\$\$ Costs more because of a more powerful burner, computerized controls but good news: The following factors are narrowing that cost difference.

\$\$ Costs less than tankless, because of a less powerful burner and less sophisticated controls; plus the ability to use existing gas and water lines in a replacement situation.

Newer technology permits use of existing gas and water lines

Tax credits and utility rebates are available in many locations

Savings in energy costs will cover the higher cost for tankless over time

SAVE MONEY W TANKLESS!

AVERAGE SAVINGS

Source: https://www.energystar.gov/products/water_heaters/water_heater_whole_home_gas_tankless/benefits_savings

A Noritz tankless Water heater is

UP TO **40%** MORE EFFICIENT THAN A 50 GALLON TANK WATER HEATER.

A Noritz tankless Water heater **saves**

9 SQ. FT. MORE SPACE THAN A 50 GALLON TANK WATER HEATER.

ENERGY SAVINGS

By heating water only when you need it, ENERGY STAR qualified tankless water heaters save the typical family more than \$100 per year on gas bills compared to a standard storage model. Larger families can save even more!

UTILITY REBATE

Many local utility companies are recognizing the benefits of tankless water heaters and are encouraging this through rebates. Check with your installer, local utility company or www.noritz.com/rebates for any available rebates in your area.
